WORK EXPERIENCE

Klosr (London, UK)

Mar 2025 - Present

CTO / Founding Engineer

- Sole technical owner of a B2B AI sales platform built from scratch, covering database schema, background workers and the React frontend.
- Designed multi-tenant Postgres on Neon with Drizzle ORM, BullMQ on Upstash Redis for background jobs, and a sequence builder with branching logic modelled as a graph.
- Shipped the outreach engine, a unified inbox with threaded replies, AI draft generation via OpenAI and Anthropic, and LinkedIn automation through Unipile.
- Held per-user infrastructure cost to roughly \$20 to \$25 at 500 leads, keeping gross margin above 75%.

North Star Group (Ticino, Switzerland)

Nov 2025 - Present

Full Stack Engineer (Intern)

- Delivered and maintained frontends for 10+ live client websites at a Swiss digital agency, owning delivery for each account.
- Co-built Polares, an AI voice agent embedded into a web interface, working directly with founders and end clients.

Alpixn (Gurugram, India)

Mar 2025 - May 2025

Full Stack Engineer (Intern)

- Built the company website in Next.js and TypeScript serving 4,000+ users with a Lighthouse score above 90, and set up Strapi CMS with a blog system so the team could publish without touching code.

EDUCATION

Amity University, Raipur, India

Jun 2022 - Jun 2026

B.Tech in Biotechnology, CGPA 8.2 out of 10 (First Class)

PROJECTS

IntervueAI

github.com/aksh10patil/IntervueAI

- Voice-based interview platform where an AI conducts full sessions in real time. Gemini generates questions, Vapi runs the voice layer, Firebase handles auth and sync, with no human in the loop at any point.

Beauty At Home

github.com/aksh10patil/beauty-app

- Salon management app covering bookings, staff scheduling, inventory and client history from one admin dashboard. Razorpay for payments with automated invoicing, frontend on AWS, APIs on Render.
